

ECONOMIC COMPETITIVENESS

Redbook 2024

The all-new, all-electric, three-row Kia EV9.

Remarkably premium.
Relentlessly capable.

Movement that inspires

The EV9 is the best of two worlds. It's a ruggedly powerful SUV with available AWD, 379 horsepower, and 5,000 lbs. of towing capacity. And, it's a sleek and premium EV, with a three-row cabin, and Kia's most advanced tech. It's all the things you never knew you could have in one amazing vehicle.

2024 EV9 GT-Line e-AWD pre-production model shown with optional features. Some features may vary. Expected late 2023. Inventory expected to be limited. No system, no matter how advanced, can compensate for all driver error and/or driving conditions. Always drive safely. Towing may significantly reduce electric range and requires additional equipment. See Owner's Manual for towing capacity, additional instructions, and warnings. Always use caution while towing.

Coming Soon

Introduction

Georgia continues to experience incredible economic success leading to the state being named the top state in the nation in which to do business for an unprecedented tenth consecutive year. Over the last five years this economic growth has meant 268,000 jobs and \$134 billion dollars invested in every corner of the state. This tremendous growth has created significant opportunities for Georgians, however risks ahead must be monitored. Technology and digitization trends have accelerated significantly and workforce shortages, as well as skills shortages, remain persistent and pervasive challenges. Looking to the state's infrastructure, significant investments are needed in our freight and logistics system to keep up with current and future growth. And housing stock shortages continue to negatively impact homeownership. The state's regulatory environment remains a top priority for the business community as lawsuit abuse continues to constrain economic opportunity, especially for small businesses. As economic uncertainty continues at the national level, maintaining a predictable, fiscally responsible tax structure becomes even more important to drive investment and growth.

Winning the war for talent, developing infrastructure of the future, and creating a more dynamic, diverse economy remain the key priorities to build the New Georgia Economy. Ensuring leaders across the state have specialized data is integral to furthering our economic success, regardless of zip code. This imperative created the need for a more strategic and data-driven approach to solving our most significant challenges and serves as the impetus for producing our second edition of the Economic Competitiveness Redbook.

Highlights from the 2024 Economic Competitiveness Redbook include:

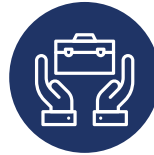

ECONOMIC OVERVIEW

Georgia's population is robust, making it the 8th most populous state with the majority of Georgians in prime working ages, 25 to 44 years old.

By 2050, the state is projected to grow to 13,390,283, an increase of nearly 2.5 million individuals. The state continues to become more diverse, and by 2050 67% of the population will be people of color.

The state has experienced strong economic growth evidenced by being ranked 11th for GDP growth and Georgia continues to be ranked 8th nationally for its tax burden keeping the state competitive.

Additional attention needs to be directed to improving the state's labor force participation rate. Georgia ranks 42nd nationally and falls behind some of our Southern competitor states. Currently, nearly 40% of working age Georgians are not engaged in the workforce.

FUTURE OF TALENT

Georgia continues to be a leader in job growth. The state ranks 7th in terms of job growth of non-agriculture employment, ahead of most southern states.

Additionally, Georgia ranks 14th in growth of high-tech employment and ranks 11th for the number of STEM doctorates. These are important indicators of our strong talent base.

However, there are concerns related to our K-12 learners. Literacy rates vary significantly depending the community you live in. Lower proficiency in literacy exists in communities outside of Atlanta, with the lowest rates in rural communities. Nationally, Georgia falls behind North Carolina, Florida, and Texas.

Georgia ranks 35th nationally when assessing the share of children living in households that are burdened by high housing costs. This is an increase over previous years with 29% of children in the state now being in high-housing cost burden households.

FOR THE PURPOSES OF THIS PUBLICATION, GEORGIA COUNTIES ARE DIVIDED AS FOLLOWS: Metro Atlanta: 11 counties clustered around Atlanta job centers. These include: Cobb, Cherokee, Clayton, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, and Rockdale. Hub Counties: 13 counties that serve as job hubs across the state. These include: Macon-Bibb, Columbia, Chatham, Athens-Clarke, Dougherty, Floyd, Glynn, Hall, Houston, Muscogee, Lowndes, Augusta-Richmond, and Whitfield. Rural Georgia: The remaining 135 counties are considered rural.

INFRASTRUCTURE OF THE FUTURE

The state's logistics infrastructure continues to be a significant strength. For example, monthly TEU throughput in the port of Savannah has increased more than 25% over the last two years.

Additionally, Georgia ranks 4th in terms of growth of jobs in the warehouse sector over the last 5 years.

Looking to healthcare which serves as vital infrastructure in communities, there are disparities that exist based on geography. More than 61% of Rural Georgians live in a health professional shortage area on average. Overall, rural Georgia has decreased access to healthcare professionals across the board and have higher rates of chronic conditions.

ECONOMIC COMPETITIVENESS

Georgia ranks highly on various metrics related to the creation of new businesses in the state, which is a strong indicator of a dynamic economy. The state ranks 6th nationally for net new businesses created and ranks 3rd in the percent of adults becoming entrepreneurs each month.

However, lower national rankings on survival rates demonstrates more resources are needed to help sustain and grow new businesses.

Georgia ranks 8th for change in capital invested over the last five years indicating the state continues to attract investment to drive innovation, however the state ranks 35th in Research and Development expenditures per capita proving more investments are needed to fully utilize the state's innovation ecosystem.

To Our Investors and Partners

AS LEADERS OF THE GEORGIA CHAMBER and the Georgia Chamber Foundation, we understand the challenges and opportunities business and community leaders across the state are facing. The data offered here is intended to help make the best decisions for the long-term prosperity of our state. The Georgia Chamber Foundation was created to lead the business community's efforts to engage in proactive long-term solutions for some of Georgia's most pressing challenges. By examining long-term trends, the Foundation performs data analysis and develops policy solutions. Our Governmental Affairs Council uses this insight to guide our advocacy and legislative priorities each year before the Georgia General Assembly, in hopes of helping businesses and employees thrive. As the Chamber continues to implement its strategic plan focused on the New Georgia Economy, thoughtful convenings will continue to inform the business community and our partners across the state on how best to capitalize on opportunities and mitigate risks. We are grateful for all the business and community leaders who have engaged in this effort. The Economic Competitiveness Redbook is an extension of this strategic effort to bolster economic growth in our communities and the state as a whole. The 2024 edition delivers abundant data and key takeaways, enabling leaders across the state to understand where Georgia has a competitive advantage and how to best increase our competitiveness. New to the edition is specific information for our rural, hub and Metro Atlanta communities, which provides more tailored insights to enhance decision making. Change is constant and we are excited about future opportunities that change will bring as elected, community and business leaders come together to build a brighter, more prosperous future for all Georgians.

PEDRO CHERRY, CHAIR
Georgia Chamber of Commerce

STUART COUNTESS, CHAIR
Georgia Chamber Foundation

THE GEORGIA CHAMBER OF COMMERCE has helped shape Georgia's economy for 109 years. Through meaningful partnerships with government, over 200 local chambers and business associations, economic developers, the Georgia Allies, national partners, and over 50,000 Georgia businesses, we successfully advocate for free enterprise, provide valuable small business resources, convene and host meaningful statewide events and programs, and offer insightful business intelligence and policy solutions. All that work is meant to help Georgia businesses address challenges and take advantage of opportunities. Today's economy warrants a more data-driven, strategic approach, leading to our renewed focus on providing data-rich resources to drive long-term planning and thoughtful decision-making. Our second edition of the annual Economic Competitiveness Redbook provides information regarding Georgia's current economic state as well as metrics related to the three strategic pillars of the New Georgia Economy. By addressing the War for Talent, generating a competitive economy, and investing in the infrastructure of the future, Georgia will continue to reach new levels of opportunity and prosperity. This publication is produced in concert with quarterly economic updates and events throughout 2024 so that you have the most up-to-date analysis. In February 2024, we will host our Future of Talent at Georgia Tech. We'll convene for our second Future of Sustainability Summit in June 2024. Our Rural Prosperity Summit will be held in Fall 2024 in Tifton. Our Diversity, Equity and Inclusion Council will host a Women Who Lead event in March 2024, and our annual Summit will be held in November 2024. Please join us for these events to learn from top public and private leaders about how to deliver meaningful solutions in your business and community. The Chamber is also offering private economic briefings and forecasting for your board, executive committees, customers, or members. Of course, you can continue to rely on our team to use data and business best practices to offer proven solutions to our locally elected leaders, the Georgia General Assembly, and statewide elected officials to support economic growth. Most importantly, we will use these insights and data to advocate for legislation and support political candidates at the state and federal level that will work to bolster the economic vitality of each Georgia business and community.

CHRIS CLARK, PRESIDENT & CEO
Georgia Chamber of Commerce

DANIELA PERRY, VICE PRESIDENT

*Discrepancies in totals may be due to differing sources between county and state level data
Sourced from the Census Bureau 2022 1 year American Community Survey

Georgia is the 8th most populous state in the nation just behind North Carolina.

2022 State Population by Race

White individuals make up the largest share of Georgia's population, followed by African Americans. However, by 2050, Georgia's share of non-white individuals is projected to increase from just over 40% to almost 67% meaning the state will become much more diverse in years to come.

*Discrepancies in totals may be due to differing sources between county and state level data
Sourced from the Governor's Office of Planning and Budget

Individuals over 65 are the fastest growing population group in the state.

Sourced from McKinsey and Company, Investing in Georgia today for the economy of tomorrow Report

2022 County Population by Race

White individuals continue to make up the largest share of the state's current population. Similarly, every community type has White individuals as the largest share of their population.

Georgia data sourced from the Governor's Office of Planning and Budget

U.S. data sourced from the Census Bureau 2022 ACS 1 year survey

*Discrepancies in totals may be due to Hispanic as an ethnicity overlayed with the other race categories, and differing sources between county and state level data

**Categories provided as by OPB. U.S. number in 'other' category includes American Indian, Asian, Native Hawaiian and 'Two or More Races' as provided by the Census.

By 2040, the greatest growth in population will be that of Hispanic individuals.

Source: Georgia Chamber Analysis of Governor's Office of Planning and Budget Population Projection Data

Georgia County Population Projections

On average, the greatest population growth will occur in Metro Atlanta counties by 2030 and by 2040. The average rural county is projected to keep pace with the average Hub County by 2030 and 2040.

County	2022 Population	2030 Population	2040 Population	2030 Growth	2040 Growth

Labor Force Participation Rate by State

Georgia ranks 42nd in growth over the last five years in the Labor Force Participation Rate. This means Georgia experienced one of the most significant declines in individuals of working age participating in the workforce. Increasing labor participation continues to be a critical part of winning the War for Talent.

2022 National Assessment of Educational Progress

Reading Assessment

Proficiency Rates by State- 4th Grade Literacy

Only 32% of Georgia fourth graders are proficient in reading. This leads to crucial preparedness issues as students advance to later grades. Georgia ranks below North Carolina, Florida, and Texas.

Number of Children Living in High-Housing Cost Burdened Households

Georgia ranks 35th nationally when assessing the share of children living in households that are burdened by high housing costs. This is an increase over previous years with 29% of children in the state now being in high housing-cost burdened households. Solutions are needed to increase access to and affordability of housing.

Number of Children Whose Parents Lack Secure Employment by State

The percentage of Georgia's children whose parents lack secure employment has risen over the last five years. This can negatively impact students' ability to remain focused on learning and future career goals. The state's growth does mirror the U.S. average and Georgia is comparable to competitor states including Texas and Tennessee, but other southern states including North Carolina, Alabama, and Mississippi have curbed this increase.

State	2017	2021	% Change	Rank: % Change

Housing Inventory by State

Over the last year Georgia has experienced more than a 6% decline in the number of active listings, ranking 27th nationally. This decline in available inventory and slowing of housing churn creates barriers for new and current homeowners as fewer home options are available on the market.

Georgia Port Monthly TEU throughput

Over the last two years, monthly TEU (twenty foot equivalent units) throughput in the port of Savannah has increased more than 25%. This incredible growth proves Georgia's prominence in the logistics sector and the need to continue investments to maintain our competitive edge.

Month	2020	2021	2022	2020 to 2022 YOY Growth

Georgia Warehousing Rental Rates

Compared to the national average, Georgia’s warehouse rental rates remain more affordable and have grown at a more reasonable rate. This bodes well for future growth of the logistics industry in Georgia.

Quarter	Average Georgia Rate	Average National Rate
Q1 -2021	\$5.14	\$6.90
Q2 -2021	\$6.25	\$7.03
Q3 -2021	\$5.57	\$7.18
Q4 -2021	\$5.98	\$7.39
Q1 -2022	\$6.30	\$7.89
Q2 - 2022	\$6.51	\$8.36
Q3 -2022	\$6.64	\$8.70
Q4-2022	\$6.65	\$8.81
Q1- 2023	\$6.84	\$9.19
Q2- 2023	\$6.86	\$9.59
% Change Q2 2021 till Q2 2023	10%	36%

2022 Electric Generation Capacity by State

Georgia ranks 7th nationally in electric generation capacity. The breadth of Georgia's network ensures reliable, affordable energy with lower risk and reduced costs for Georgians and Georgia businesses.

2023 Georgia Broadband Service by County

Counties in Rural Georgia still experience significantly higher percentages of unserved individuals with the average county in Rural Georgia experiencing 17.7% unserved as opposed to 2.9% in a Hub County and 0.3% in Metro Atlanta. However, there has been significant progress in coverage of Rural Georgia as a whole; now only 10.7% of the region is unserved. This is due in part to significant private investment as well as nearly \$1 billion invested by Governor Kemp.

2022 Share of Population living in Health Professional Shortage Area by County

More than 61% of Rural Georgians live in a health professional shortage area on average. This is the highest share of any community type, but 46% of citizens living in Hub communities are in a health professional shortage area and Metro Atlanta is, on average, much lower. This demonstrates the significant need to expand our healthcare workforce to meet current and growing needs.

Georgia Rate of Medical Professionals per 100K Residents

Overall, Hub communities have the highest rates of physicians, physician's assistants, and nurses per one hundred thousand individuals. Rural Georgia faces disparities in the number of physicians and physician's assistants and Metro Atlanta lags slightly behind Hub communities.

County	Physician Rate per 100K Residents	PA Rate per 100k Residents	Nurse Rate per 100k Residents
Georgia	237	36	1,336
Rural Georgia	107	18	1,420

Georgia Non-Communicable Disease Data by County

Rural Georgia counties have the highest rates of citizens with chronic conditions, also known as non-communicable diseases. Chronic conditions have the propensity to inhibit economic growth because less healthy individuals are less able to contribute to their communities and workplaces.

County	Access to Mental Health-- Providers per 100k (average)	Avg. Beneficiaries with Heart Disease	Avg. Diagnosed (20+) with Diabetes	Avg. Beneficiaries with Kidney Disease	Avg. Beneficiaries with COPD

Sourced from the U.S. Chamber of Commerce, based on Census Bureau Business Formation Statistic Survey

Georgia ranks 45th when looking at the percent of business applications actually forming into a business. This indicates there is an opportunity to better potential entrepreneurs as they develop their business plans and business models

Business Applications by County

Most business applications came from the Metro Atlanta area. However, the greatest growth in business applications over the last five years has occurred in rural counties and Hub counties. This indicates innovative ideas are occurring around the state and more resources might be needed to support entrepreneurial efforts in Hub communities and Rural Georgia.

Sourced from the Census Bureau County Business Patterns 2019 and 2021 Surveys

The greatest growth in business applications, or the idea for a business is in rural Georgia and Hub communities. Alternatively this data shows the greatest growth in actual businesses is in Metro Atlanta. More assistance is needed to ensure business proposals have sound business plans to become successful businesses.

2021 Entrepreneur Data by State

Georgia's high rate of entrepreneurship but relatively mid-rank of opportunity share indicates that many of the entrepreneurs in the state have only ever been entrepreneurs, which increases the importance for access to capital and resources for small businesses. Opportunity share of new entrepreneurs captures individuals who left other economic and educational activities to start a business, as opposed to leaving unemployment to start a business.

‘Opportunity share of New Entrepreneurs’ captures individuals who left other economic and educational activities to start a business, as opposed to leaving unemployment to start a business.

2022 Startups per State

Start-up early job creation and early-stage survival rates are important indicators of early state entrepreneurship. Georgia's high job creation rank proves our state has a strong climate to foster entrepreneurialism but ranking 35th in survival rate indicates more resources need to be devoted to sustaining our start-ups. Start-up job creation reflects the number of jobs per 1,000 created by start-ups in their first year.

Innovation Competitiveness Index by State

The Innovation Competitiveness Index weighs a mix of 14 indicators from research & development (R&D) intensity to education workforce and manufacturing output to create an internationally comparable index of innovation. Georgia ranks 24th nationally, as states including Texas, North Carolina, and Virginia outpace us in research and development spending. This opens significant opportunity for investment in Georgia's R&D capital and innovative ecosystem.

A less dynamic economy is usually less resilient, less innovative, less productive, and has less opportunity in the long-run.

2021 Business Birth and Death Rates by State

Business births and deaths measure the percent of businesses entering and exiting the economy. The net growth measures indicate overall growth of new business in a given time frame. Georgia ranks 6th nationally in terms of net growth of businesses proving the state continues to attract entrepreneurship and maintain a strong business climate.

2020 Tort Costs by State

Georgia ranks 7th nationally in tort costs per household, leading to Georgia families paying \$600 more than the average U.S. family due to expenses from lawsuit abuse. When looking at our Southern economic competitors, only Florida has higher tort costs per household, and they recently enacted legislation to address the issue.

Sourced from the U.S. Chamber Institute for Legal Reform "Tort Costs in America" 2022 Report

Georgia ranks 9th nationally in terms of tort costs as a share of the state's GDP which is impacting the state's ability to grow economically.

2023 Average Annual Cost of Auto Insurance by State and Coverage

Georgia ranks 38th nationally when examining the annual cost of minimum coverage for car insurance. Many southern states are more affordable than Georgia. The prevalence of lawsuit abuse throughout Georgia is driving up costs for citizens above the national average and many other competitor states.

Rural Insights

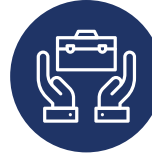

This section will highlight key statistics related to demographics and workforce, but through a rural lens, featuring the significant influence and importance Rural Georgia has on the entire state.

POPULATION TRENDS

- From 2010 to 2020, Rural Georgia's population, on average, grew by 6.17%. This growth is due in part to new economic development announcements.
- By 2050, Rural Georgia's population is projected to grow by 20%. This demonstrates growth will continue in Rural Georgia; however, it will not be spread equally among communities, and some will experience population declines.

WORKFORCE TRENDS

- By 2050 Rural Georgia counties, on average, are projected to experience job growth of 45%. The average Georgia county is expected to experience job growth of 46%.
- Labor Force Participation Rate: 57.5%. This is below the state's rate of 61.6% proving there is a more pressing need to increase participation in the workforce in rural communities.

KEY ECONOMIC DRIVERS

- The senior population in Rural Georgia grew at nearly 20% in 2020 compared to 15% across the state and is projected to grow 2-3 percentage points higher by 2040.
- Rural Georgia accounts for 54% of total lane miles on Georgia roads and nearly one-fourth of personal vehicle miles traveled in Georgia are on rural roadways.
- Small businesses represent over 45% of total sales in the rural economy.
 - *Furthermore, there are nearly ¼ of Georgia counties where small businesses represent 50% or more of their total consumer spending and all of those are rural. This proves small businesses are the backbone of the Rural economy.*

ACTIONABLE INSIGHTS

- Rural populations aged 30 to 64 are projected to continue to decline until leveling and beginning to recover near 2035. This coupled with a lower labor force participation rate means creative, innovative solutions and support will be needed to drive adults to the workforce.
 - *This might include wrap around services for healthcare and employment as well as childcare and transportation assistance.*
- Individuals over 65 years old are the fastest growing population in the state, but the increased growth translates to a more significant impact in rural communities where the growth is higher. This means it is vital to ensure services older Georgians will need, including those related to healthcare and aging, have the capacity for growth.
- Small businesses are integral to the rural economy but need additional assistance to grow and scale. Partnerships and resources to increase social, human, and financial capital will be invaluable in driving the rural economy forward.

Hub Insights

This section will highlight our Hub communities, including key insights on the issues of workforce, infrastructure, and defense installations and their economic impact.

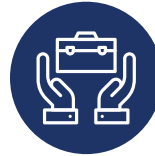

POPULATION TRENDS

- From 2010 to 2020, Hub communities' population, on average, grew by 6.9%. This is below the state average of 10.28%.

- Hub regions are expected to experience an 18.53% increase in population by 2050.

WORKFORCE TRENDS

- By 2050, Hub counties, on average, are projected to experience job growth of 30%. The average Georgia county is expected to experience job growth of 46%.

- Labor Force Participation Rate: 57.0%. This is below the state's rate of 61.6% proving there is a more pressing need to increase participation in the workforce in Hub communities.

KEY ECONOMIC DRIVERS

- Georgia's Hub communities are home to 9 of Georgia's 11 defense installations. These installations contribute an estimated \$22 billion annually to the Georgia economy.

- The Port of Savannah is the largest single container terminal in North America and the Port of Brunswick is one of the fastest growing auto ports in North America.
- Hub communities also house the three largest hospitals outside of Metro Atlanta.
- Small businesses generate nearly 38% of sales in Hub communities.

ACTIONABLE INSIGHTS

- Hub communities are experiencing greater growth than the Rural economy, however lagging Metro Atlanta. Strategic investments are needed to propel growth in our hub communities which serve as job centers across the state.

- Investments in freight and logistics infrastructure will aid in growth of the Hub economy as these communities serve as critical connectors in moving goods throughout the state.
- Georgia's defense installations are significant economic drivers and bring skilled talent into the state. Solutions to better aid the transition of military families and veterans from a workforce perspective are important to keep Georgia competitive in maintaining our bases and the talent already here.

Metro Atlanta Insights

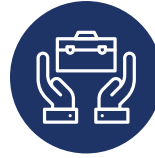

This section will feature the most significant opportunities to continue to drive growth and opportunity in Metro Atlanta with a specific focus on innovation, housing, and infrastructure.

POPULATION TRENDS

- From 2010 to 2020, Metro Atlanta's population, on average, grew by 15.13%, the highest growth of any community type and above the state average.
- The Metro Atlanta Area population is expected to increase by 31.38% by 2050.

WORKFORCE TRENDS

- By 2050, Metro Atlanta counties, on average, are projected to experience job growth of 53%. The average Georgia county is expected to experience job growth of 46%.
- Labor Force Participation Rate: 66.4%. This is above the state's rate of 61.6% indicating this is a strength compared to other parts of the state.

KEY ECONOMIC DRIVERS

- Metro Atlanta was ranked in the top quartile of the Technology Workforce Diversity Index by CompTIA and ranks in the top ten Metro for its net tech employment in 2023. The region is an innovation hub and continues to grow existing companies and attract new ones due to our strong, diverse talent base.
- Hartsfield Jackson International Airport continues to be the "World's Busiest Airport". Atlanta continues to play a major role in the state's infrastructure and logistics network.
- While Atlanta has experienced the highest growth in housing units over the last two years, a deficit remains creating access and affordability challenges to homeownership.

ACTIONABLE INSIGHTS

- Metro Atlanta continues to lead the state in terms of job growth and population growth, proving the region is integral to the state's overall success. While this growth brings significant opportunity, challenges also occur because there is so much growth concentrated in a smaller geographic region. Effective management of job and population growth is required to avoid mismatches and capitalize on opportunity.
- Investments in freight and logistics infrastructure are important for the entire state, but especially in Metro Atlanta due to existing bottlenecks. Investments in infrastructure will be integral to keep freight moving efficiently throughout the state.

POWER UP

MEAG Power helps companies power up through its nearly 70% emissions-free generation portfolio. It's some of the cleanest, most reliable and cost-effective wholesale power around. And it's delivered through 49 Georgia communities that mean business.

These public power communities are ideal home towns for your company's present and future. With locally owned and managed electric utilities, they have the flexibility to adjust rates to attract new business. And because the electric utility revenue is retained and reinvested in the community, these already great places to live just keep getting better.

For companies looking for a place to put down roots that offers ultra-clean, highly reliable, low-cost power, locate your enterprise in one of these MEAG Power communities – **and power up.**
